Arteriosclerosis

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Index to Volume 3 January-December 1983

Subject Index

A

Acetylated lipoprotein

Low density lipoprotein metabolism by endothelial cells from human umbilical cord arteries and veins, 547

Acylcoenzyme A:cholesterol acyltransferase (ACAT)

Dietary fat saturation and hepatic acylcoenzyme A:cholesterol acyltransferase activity. Effect of n-3 polyunsaturated and long-chain saturated fat, 242

Acyltransferase activity

Dietary fat saturation and hepatic acylcoenzyme A:cholesterol acyltransferase activity. Effect of n-3 polyunsaturated and long-chain saturated fat, 242

Age

Age-related changes in composition and mechanical properties of the tunica media of the upper thoracic human aorta, 64
Effect of age on arterial distensibility in asymptomatic humans, 199

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 1. Lipoprotein cholesterol and triglyceride concentrations, 117

Air-drying-induced arteriosclerosis

Morphometry of air-drying-induced arteriosclerosis in rat carotid artery. Effect of air-flow rate, 441

Albumin

Aortic endothelial and smooth muscle histamine metabolism. Relationship to aortic ¹²⁵I-albumin accumulation in experimental diabetes, 599

Ammonium ion

Inhibition of LDL degradation in cultured human fibroblasts induced by endothelial cell-conditioned medium, 560

Angiotensin-converting enzyme

Angiotensin-converting enzyme in cultured endothelial cells. Synthesis, degradation, and transfer to culture medium, 581

Animal studies, monkey

Enhanced cholesterol delivery to cells in culture by low density lipoproteins from hypercholesterolemic monkeys. Correlation of cellular cholesterol accumulation with low density lipoprotein molecular weight, 77
Lipoprotein profiles in rhesus monkeys with divergent responses to dietary cholesterol, 223

Animal studies, rabbit

Cellular pathology of progressive atherosclerosis in the WHHL rabbit. An animal model of familial hypercholesterolemia, 87
Cholesterol-induced atherosclerosis. Clonal characteristics of arterial lesions in the hybrid hare, 574
Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2

Interaction of platelets and fibrin with injured rabbit aortic neointima. Effect of prostaglandin I_2 and heparin, 141
Lipid composition of rabbit aortic wall following removal of endothelium by balloon catheter, 413

Small liver fenestrae may explain the susceptibility of rabbits to atherosclerosis, 344
A system for long-term perfusion of rabbit aorta in vitro, 366

Animal studies, rat

Dietary fat saturation and hepatic acylcoenzyme A:cholesterol acyltransferase activity. Effect of n-3 polyunsaturated and long-chain saturated fat, 242

Endothelial regeneration in hypertensive and genetically hypercholesterolemic rats, 206

Morphometry of air-drying-induced arteriosclerosis in rat carotid artery. Effect of air-flow rate, 441

Plasma phosphatidylcholine/free cholesterol ratio as an indicator for atherosclerosis, 389

The role of potassium manipulation in blood pressure control, 302

Antibodies

Characterization of monoclonal antibodies against human low density lipoprotein, 23

Meeting summary. Workshop on Apolipoprotein Quantification, 452

Monoclonal antibodies to E92, an endothelial cell surface antigen, 403

Antigen E92

Monoclonal antibodies to E92, an endothelial cell surface antigen, 403

Antiplatelet drugs

Vessel injury, platelet adherence, and platelet survival, 529

Aorta

Age-related changes in composition and mechanical properties of the tunica media of the upper thoracic human aorta, 64

Aortic endothelial and smooth muscle histamine metabolism. Relationship to aortic ¹²⁵I-albumin accumulation in experimental diabetes, 599

Endothelial regeneration in hypertensive and genetically hypercholesterolemic rats, 206

Enhanced macrophage degradation of biologically modified low density lipoprotein, 149

Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2

Interaction of platelets and fibrin with injured rabbit aortic neointima. Effect of prostaglandin I_2 and heparin, 141

Lipid composition of rabbit aortic wall following removal of endothelium by balloon catheter, 413

A system for long-term perfusion of rabbit aorta in vitro, 366

Aortic denudation

Endothelial regeneration in hypertensive and genetically hypercholesterolemic rats, 206

Morphometry of air-drying-induced arteriosclerosis in rat carotid artery. Effect of air-flow rate, 441

Apolipoprotein A-I

Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

High density lipoprotein apoprotein variability in a biracial population, 132

Lipoprotein profiles in rhesus monkeys with divergent responses to dietary cholesterol, 223

Meeting summary. Workshop on Apolipoprotein Quantification, 452

Risk factors for peripheral atherosclerosis. Retrospective evaluation by stepwise discriminant analysis, 57

Apolipoprotein A-II

Meeting summary. Workshop on Apolipoprotein Quantification, 452

Risk factors for peripheral atherosclerosis. Retrospective evaluation by stepwise discriminant analysis, 57

Apolipoprotein B

- Characterization of monoclonal antibodies against human low density lipoprotein, 23
- Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568
- Increased catabolism of native and cyclohexanedione-modified low density lipoprotein in subjects with myeloproliferative diseases, 233
- Increased low density lipoprotein production associated with obesity, 170
- Lipoprotein profiles in rhesus monkeys with divergent responses to dietary cholesterol, 223
- Meeting summary. Workshop on Apolipoprotein Quantification, 452
- Overproduction of low density lipoproteins associated with coronary heart disease, 40
- Remnants of lipoproteins of intestinal and hepatic origin in familial dysbetalipoproteinemia, 47
- Risk factors for peripheral atherosclerosis. Retrospective evaluation by stepwise discriminant analysis, 57

Apolipoprotein C-III

- Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

Apolipoprotein D

- Meeting summary. Workshop on Apolipoprotein Quantification, 452

Apolipoprotein E

- Apolipoprotein E polymorphism and coronary artery disease, 310
- Lipoprotein profiles in rhesus monkeys with divergent responses to dietary cholesterol, 223
- Meeting summary. Atherosclerosis Regression, Arterial Wall Cell Interactions, and Atherogenic Lipoproteins, 627
- Meeting summary. Workshop on Apolipoprotein Quantification, 452
- Umbilical cord blood lipoproteins. Isolation and characterization of high density lipoproteins, 357

Apolipoprotein, plasma

- High density lipoprotein apoprotein variability in a biracial population, 132

Arachidonic acid

- Arachidonic acid availability and prostacyclin production by cultured human endothelial cells, 323
- Plasma phosphatidylcholine/free cholesterol ratio as an indicator for atherosclerosis, 389

Arterial distensibility

- Effect of age on arterial distensibility in asymptomatic humans, 199

Arterial lesions

- Cholesterol-induced atherosclerosis. Clonal characteristics of arterial lesions in the hybrid hare, 574
- Low density lipoprotein metabolism by endothelial cells from human umbilical cord arteries and veins, 547

Arterial wall

- Meeting summary. Atherosclerosis Regression, Arterial Wall Cell Interactions, and Atherogenic Lipoproteins, 627

Arteriography

- Noninvasive evaluation of arteriosclerosis. Comparison of methods, 103

Aspirin

- Ibuprofen protects platelet cyclooxygenase from irreversible inhibition by aspirin, 383

Atherogenesis

- Aortic endothelial and smooth muscle histamine metabolism. Relationship to aortic ¹²⁵I-albumin accumulation in experimental diabetes, 599
- Meeting summary. Atherosclerosis Regression, Arterial Wall Cell Interactions, and Atherogenic Lipoproteins, 627

Atherosclerosis

- Aortic endothelial and smooth muscle histamine metabolism. Relationship to aortic ¹²⁵I-albumin accumulation in experimental diabetes, 599
- Cellular pathology of progressive atherosclerosis in the WHHL

- rabbit. An animal model of familial hypercholesterolemia, 87
 - Cholesterol-induced atherosclerosis. Clonal characteristics of arterial lesions in the hybrid hare, 574
 - Endothelial regeneration in hypertensive and genetically hypercholesterolemic rats, 206
 - Enhanced macrophage degradation of biologically modified low density lipoprotein, 149
 - Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2
 - George Lyman Duff Memorial Lecture: Lipoproteins and atherosclerosis. A look back and a look ahead, 283
 - Interaction of two lipid disorders in a large French-Canadian kindred, 13
 - Lipid composition of rabbit aortic wall following removal of endothelium by balloon catheter, 413
 - Meeting summary. Atherosclerosis Regression, Arterial Wall Cell Interactions, and Atherogenic Lipoproteins, 627
 - Meeting summary. Conference on the Biology of Inflammation, Cell-Cell Interactions, Connective Tissue, and Endothelial Reactions. Potential new approaches to atherosclerosis research, 398
 - Meeting summary. Quantitative Evaluation of Atherosclerosis, 183
 - Morphometry of air-drying-induced arteriosclerosis in rat carotid artery. Effect of air-flow rate, 441
 - Noninvasive evaluation of arteriosclerosis. Comparison of methods, 103
 - On experimental cholesterol steatosis and its significance in the origin of some pathological processes, 178
 - Plasma phosphatidylcholine/free cholesterol ratio as an indicator for atherosclerosis, 389
 - Pulsatile flow in a model carotid bifurcation, 31
 - Racial differences in platelet survival time in patients with symptomatic coronary atherosclerosis, 138
 - Risk factors and atherosclerotic lesions. A review of autopsy studies, 187
 - Risk factors for peripheral atherosclerosis. Retrospective evaluation by stepwise discriminant analysis, 57
 - Small liver fenestrae may explain the susceptibility of rabbits to atherosclerosis, 344
 - Uptake and degradation of human chylomicrons by macrophages in culture. Role of lipoprotein lipase, 433
 - Vessel injury, platelet adherence, and platelet survival, 529
- Autopsy studies**
- Risk factors and atherosclerotic lesions. A review of autopsy studies, 187

B**Balloon catheter**

- Lipid composition of rabbit aortic wall following removal of endothelium by balloon catheter, 413

Beta-very low density lipoprotein, see Lipoprotein, beta-very low density**Biracial population survey**

- Family aggregation of high density lipoprotein cholesterol. Collaborative Lipid Research Clinics Program Family Study, 616
- High density lipoprotein apoprotein variability in a biracial population, 132

Blood lipids

- Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568
- Joint distribution of lipoprotein cholesterol classes. The Framingham Study, 260

Blood lipoproteins

- Umbilical cord blood lipoproteins. Isolation and characterization of high density lipoproteins, 357

Blood pressure

- Endothelial regeneration in hypertensive and genetically hypercholesterolemic rats, 206

Risk factors and atherosclerotic lesions. A review of autopsy studies, 187

The role of potassium manipulation in blood pressure control, 302

Body weight

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 1. Lipoprotein cholesterol and triglyceride concentrations, 117

Influence of weight reduction on plasma lipoproteins in obese patients, 160

Bruit

Noninvasive evaluation of arteriosclerosis. Comparison of methods, 103

Bypass, coronary

Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

C

Calcium

Factors associated with lipoprotein cholesterol levels. The Framingham Study, 273

Carotid artery

Morphometry of air-drying-induced arteriosclerosis in rat carotid artery. Effect of air-flow rate, 441

Noninvasive evaluation of arteriosclerosis. Comparison of methods, 103

Carotid bifurcation

Pulsatile flow in a model carotid bifurcation, 31

Catabolism

Increased catabolism of native and cyclohexanedione-modified low density lipoprotein in subjects with myeloproliferative diseases, 233

Cell-cell interactions

Meeting summary. Atherosclerosis Regression, Arterial Wall Cell Interactions, and Atherogenic Lipoproteins, 627

Meeting summary. Conference on the Biology of Inflammation, Cell-Cell Interactions, Connective Tissue, and Endothelial Reactions. Potential new approaches to atherosclerosis research, 398

Cell-wall interactions

Meeting summary. Atherosclerosis Regression, Arterial Wall Cell Interactions, and Atherogenic Lipoproteins, 627

Cells, cholesterol

Enhanced cholesterol delivery to cells in culture by low density lipoproteins from hypercholesterolemic monkeys. Correlation of cellular cholesterol accumulation with low density lipoprotein molecular weight, 77

Cells, cultured

Angiotensin-converting enzyme in cultured endothelial cells. Synthesis, degradation, and transfer to culture medium, 581

Arachidonic acid availability and prostacyclin production by cultured human endothelial cells, 323

Enhanced cholesterol delivery to cells in culture by low density lipoproteins from hypercholesterolemic monkeys. Correlation of cellular cholesterol accumulation with low density lipoprotein molecular weight, 77

Inhibition of LDL degradation in cultured human fibroblasts induced by endothelial cell-conditioned medium, 560

Lipoprotein oxidation and lipoprotein-induced cytotoxicity, 215

Uptake and degradation of human chylomicrons by macrophages in culture. Role of lipoprotein lipase, 433

Cells, endothelial

Angiotensin-converting enzyme in cultured endothelial cells. Synthesis, degradation, and transfer to culture medium, 581

Arachidonic acid availability and prostacyclin production by cultured human endothelial cells, 323

Enhanced macrophage degradation of biologically modified low density lipoprotein, 149

George Lyman Duff Memorial Lecture: Lipoproteins and atherosclerosis. A look back and a look ahead, 283

Inhibition of LDL degradation in cultured human fibroblasts induced by endothelial cell-conditioned medium, 560

Low density lipoprotein metabolism by endothelial cells from human umbilical cord arteries and veins, 547

Monoclonal antibodies to E92, an endothelial cell surface antigen, 403

A system for long-term perfusion of rabbit aorta in vitro, 366

Cells, foam

Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2

Cells, pathology

Cellular pathology of progressive atherosclerosis in the WHHL rabbit. An animal model of familial hypercholesterolemia, 87

Cells, smooth muscle

Effects of high density lipoprotein subfractions on cholesterol homeostasis in human fibroblasts and arterial smooth muscle cells, 420

Enhanced macrophage degradation of biologically modified low density lipoprotein, 149

Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2

A system for long-term perfusion of rabbit aorta in vitro, 366

Cerebral arteries

Risk factors and atherosclerotic lesions. A review of autopsy studies, 187

Cholesterol steatosis

On experimental cholesterol steatosis and its significance in the origin of some pathological processes, 178

Cholesterol

Cholesterol-induced atherosclerosis. Clonal characteristics of arterial lesions in the hybrid hare, 574

Effects of high density lipoprotein subfractions on cholesterol homeostasis in human fibroblasts and arterial smooth muscle cells, 420

Enhanced cholesterol delivery to cells in culture by low density lipoproteins from hypercholesterolemic monkeys. Correlation of cellular cholesterol accumulation with low density lipoprotein molecular weight, 77

Enhanced macrophage degradation of biologically modified low density lipoprotein, 149

Family aggregation of high density lipoprotein cholesterol. Collaborative Lipid Research Clinics Program Family Study, 616

High density lipoprotein apoprotein variability in a biracial population, 132

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 1. Lipoprotein cholesterol and triglyceride concentrations, 117

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 2. Lipoprotein lipid interrelationships, 125

Increased catabolism of native and cyclohexanedione-modified low density lipoprotein in subjects with myeloproliferative diseases, 233

Influence of exercise and life-style variables upon high density lipoprotein cholesterol after myocardial infarction, 249

Influence of plasma lipoproteins on platelet aggregation in a normal male population, 332

Influence of weight reduction on plasma lipoproteins in obese patients, 160

Insulin-mediated increases in the HDL cholesterol/cholesterol ratio in humans, 339

Interaction of two lipid disorders in a large French-Canadian kindred, 13

Lipoprotein profiles in rhesus monkeys with divergent responses to dietary cholesterol, 223

On experimental cholesterol steatosis and its significance in the origin of some pathological processes, 178

Plasma phosphatidylcholine/free cholesterol ratio as an indicator for atherosclerosis, 389

Risk factors for peripheral atherosclerosis. Retrospective evaluation by stepwise discriminant analysis, 57

Variability in individual serum cholesterol response to change in diet, 349

Cholesterol balance

Increased low density lipoprotein production associated with obesity, 170

Cholesterol concentration

Enhanced cholesterol delivery to cells in culture by low density lipoproteins from hypercholesterolemic monkeys. Correlation of cellular cholesterol accumulation with low density lipoprotein molecular weight, 77

High density lipoprotein apoprotein variability in a biracial population, 132

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 1. Lipoprotein cholesterol and triglyceride concentrations, 117

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 2. Lipoprotein lipid interrelationships, 125

Cholesterol esterification

Dietary fat saturation and hepatic acylcoenzyme A:cholesterol acyltransferase activity. Effect of n-3 polyunsaturated and long-chain saturated fat, 242

Cholesterol feeding

Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2

Lipoprotein profiles in rhesus monkeys with divergent responses to dietary cholesterol, 223

Cholesterol homeostasis

Effects of high density lipoprotein subfractions on cholesterol homeostasis in human fibroblasts and arterial smooth muscle cells, 420

Cholesterol, lipoprotein high density

High density lipoprotein apoprotein variability in a biracial population, 132

Risk factors and atherosclerotic lesions. A review of autopsy studies, 187

Cholesterol synthesis

Characterization of monoclonal antibodies against human low density lipoprotein, 23

Cholesteryl arachidonate

Plasma phosphatidylcholine/free cholesterol ratio as an indicator for atherosclerosis, 389

Chylomicrons

Uptake and degradation of human chylomicrons by macrophages in culture. Role of lipoprotein lipase, 433

Cigarette smoking

Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

Risk factors and atherosclerotic lesions. A review of autopsy studies, 187

Claudication

Noninvasive evaluation of arteriosclerosis. Comparison of methods, 103

Clonal characteristics

Cholesterol-induced atherosclerosis. Clonal characteristics of arterial lesions in the hybrid hare, 574

Cocoa butter

Dietary fat saturation and hepatic acylcoenzyme A:cholesterol acyltransferase activity. Effect of n-3 polyunsaturated and long-chain saturated fat, 242

Colestipol

Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

Collagen, type V

Diminished platelet adherence to type V collagen, 589

Combined therapy

Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

Conditioned medium

Inhibition of LDL degradation in cultured human fibroblasts induced by endothelial cell-conditioned medium, 560

Confluency

Low density lipoprotein metabolism by endothelial cells from

human umbilical cord arteries and veins, 547

Connective tissue

Meeting summary. Conference on the Biology of Inflammation, Cell-Cell Interactions, Connective Tissue, and Endothelial Reactions. Potential new approaches to atherosclerosis research, 398

Coronary artery disease

Apolipoprotein E polymorphism and coronary artery disease, 310

Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

Racial differences in platelet survival time in patients with symptomatic coronary atherosclerosis, 138

Risk factors and atherosclerotic lesions. A review of autopsy studies, 187

Coronary bypass

Combined therapy of niacin, colestipol, and fat-controlled diet in men with coronary bypass. Effect on blood lipids and apolipoproteins, 568

Coronary heart disease

Family aggregation of high density lipoprotein cholesterol. Collaborative Lipid Research Clinics Program Family Study, 616

High density lipoprotein apoprotein variability in a biracial population, 132

Influence of exercise and life-style variables upon high density lipoprotein cholesterol after myocardial infarction, 249

Joint distribution of lipoprotein cholesterol classes. The Framingham Study, 260

Overproduction of low density lipoproteins associated with coronary heart disease, 40

Racial differences in platelet survival time in patients with symptomatic coronary atherosclerosis, 138

Risk factors and atherosclerotic lesions. A review of autopsy studies, 187

Serum triglyceride and risk of coronary heart disease, stroke, and total mortality in Japanese-American men, 316

Correlations

Plasma phosphatidylcholine/free cholesterol ratio as an indicator for atherosclerosis, 389

Council on Arteriosclerosis

Abstracts submitted to the 37th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Anaheim, California, November 1983, 465a

Cultural factors

High density lipoprotein apoprotein variability in a biracial population, 132

Racial differences in platelet survival time in patients with symptomatic coronary atherosclerosis, 138

Cyclohexanedione-modified LDL

Increased catabolism of native and cyclohexanedione-modified low density lipoprotein in subjects with myeloproliferative diseases, 233

Cyclooxygenase

Ibuprofen protects platelet cyclooxygenase from irreversible inhibition by aspirin, 383

Cytotoxicity

Lipoprotein oxidation and lipoprotein-induced cytotoxicity, 215

D**Diabetes**

Aortic endothelial and smooth muscle histamine metabolism. Relationship to aortic 125 I-albumin accumulation in experimental diabetes, 599

Interaction of two lipid disorders in a large French-Canadian kindred, 13

Diagnosis, noninvasive

Noninvasive evaluation of arteriosclerosis. Comparison of methods, 103

Diet

- Changes of high density lipoprotein subfraction concentration and composition by intralipid in vivo and by lipolysis of intralipid in vitro, 607
- Dietary fat saturation and hepatic acylcoenzyme A:cholesterol acyltransferase activity. Effect of n-3 polyunsaturated and long-chain saturated fat, 242
- Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2
- Lipoprotein profiles in rhesus monkeys with divergent responses to dietary cholesterol, 223

A system for long-term perfusion of rabbit aorta in vitro, 366

Steatosis

On experimental cholesterol steatosis and its significance in the origin of some pathological processes, 178

Stroke

Noninvasive evaluation of arteriosclerosis. Comparison of methods, 103

Serum triglyceride and risk of coronary heart disease, stroke, and total mortality in Japanese-American men, 316

T

Thoracic human aorta

Age-related changes in composition and mechanical properties of the tunica media of the upper thoracic human aorta, 64

Thrombosis

Diminished platelet adherence to type V collagen, 589

Tissue culture

Enhanced cholesterol delivery to cells in culture by low density lipoproteins from hypercholesterolemic monkeys. Correlation of cellular cholesterol accumulation with low density lipoprotein molecular weight, 77

Foam cells in explants of atherosclerotic rabbit aortas have receptors to β -very low density lipoproteins and modified low density lipoproteins, 2

Training threshold

Influence of exercise and life-style variables upon high density lipoprotein cholesterol after myocardial infarction, 249

Tryglycerides

Changes of high density lipoprotein subfraction concentration and composition by intralipid in vivo and by lipolysis of intralipid in vitro, 607

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 1. Lipoprotein cholesterol and triglyceride concentrations, 117

Hyperlipidemia in the Pacific Northwest Bell Telephone Company Health Survey. Part 2. Lipoprotein lipid interrelationships, 125

Influence of exercise and life-style variables upon high density lipoprotein cholesterol after myocardial infarction, 249

Influence of weight reduction on plasma lipoproteins in obese patients, 160

Insulin-mediated increases in the HDL cholesterol/cholesterol ratio in humans, 339

Interaction of two lipid disorders in a large French-Canadian kindred, 13

Serum triglyceride and risk of coronary heart disease, stroke, and total mortality in Japanese-American men, 316

Tunica media, thoracic aorta

Age-related changes in composition and mechanical properties of the tunica media of the upper thoracic human aorta, 64

U

Umbilical cord

Low density lipoprotein metabolism by endothelial cells from human umbilical cord arteries and veins, 547

Umbilical cord blood lipoproteins. Isolation and characterization of high density lipoproteins, 357

Urban environment

High density lipoprotein apoprotein variability in a biracial population, 132

V

Very low density lipoprotein, *see* Lipoprotein, very low density

Vessel injury

Vessel injury, platelet adherence, and platelet survival, 529

W

Wall-cell interactions

Meeting summary. Atherosclerosis Regression, Arterial Wall Cell Interactions, and Atherogenic Lipoproteins, 627

Watanabe heritable hyperlipidemic rabbit (WHHL)

Cellular pathology of progressive atherosclerosis in the WHHL rabbit. An animal model of familial hypercholesterolemia, 87

X

Xanthomas

Interaction of two lipid disorders in a large French-Canadian kindred, 13
